

CE - OX

ACID CLEANER DEOXIDIZER

DEVELOPED FOR REMOVING STAINS, MORTAR
AND LIME DEPOSITS. ACID EMULSION

PRODUCT DESCRIPTION:

This is a highly concentrated acid emulsion especially developed for masonry cleaning. **CE-OX** contains a combination of various acids and wetting agents to facilitate the tough job of removing mortar, stains and lime deposits. **CE-OX** contains inhibitors to guard against harmful effects on any surfaces on which it is used. **CE-OX** rinses freely with water. Use **CE-OX** to clean floors and walls, brick, stone, block and tools used in working with concrete, mortar and plaster.

SPECIFICATIONS

Appearance	Liquid
Odor	Fruity
Specific Gravity	1.070 ± 0.005
Density	8.93 ± 0.05 lb/gal
Boiling Point	Near 212° F
pH	1.5 ± 0.5
Stability	One year min.

BENEFITS

Spray, Dip Or Apply With Bush
Developed For Masonry Cleaning
Inhibitors Protect Surfaces
Rinses Feely Wth Wter

DIRECTIONS FOR USE

Apply by brushing, spraying or dipping. Allow to soak several minutes and then rinse thoroughly with water. For extremely heavy encrustations of lime, rust or concrete, repeat the application. Rinse well by hose, bucket or sponge. Be sure that all the cleaner has been removed from metal or painted surfaces after the cleaner has done its work. For most applications, simple agitation with a stiff brush may be helpful in removing stubborn accumulations of scale and film.
