

COPPER 2000

ANTI-SEIZE

Copper 2000 is a premium copper/graphite blend anti-seize specifically formulated for high applications. **Copper 2000** protects parts from corrosion, rust, galling and seizing. Lubricates bolt threads while easing assembly and disassembly of metal parts. Lubricates bolt threads while reducing friction and wear. Suitable for most metals and is non-corrosive. Will extend fastener life. Meets MIL-A-907-E Temperature resistant to 2000°F

We recommend copper 2000 for use on:

- Nuts, bolts and studs
- Manifold and heat exchangers
- Fittings and shafts
- Press-fits and packaging
- Flange bolts, Pumps and Valves
- Marine Fasteners
- Turbines
- Dies
- Steam Traps

Copper 2000 can be used in:

- Factories
- Paper Mills
- Power Plants
- Steel Mills
- Textile Plants
- Refineries
- Assembly Plants

Packaged in convenient 8 oz and 1 lb Brush Top Cans
