

NICKEL 2600 ANTI-SEIZE

Nickel 2600 is a premium nickel/graphite blend specifically formulated for extreme temperatures. This anti-seize also provides excellent chemical resistance. **Nickel 2600** protects parts from corrosion, rust, galling, and seizing. Lubricates bolt threads while easing assembly and disassembly of metal parts, including stainless steel and soft metals. **Nickel 2600** is copper and lead- free, non-corrosive and acid resistant. Meets MIL-A-907-E. Temperature resistant to 2600°F

We recommend Nickel 2600 for use on:

- Special Alloy Metals, including Stainless Steel.
- Applications Involving Strong Acids
- High-temperature Nuts, Bolts, and Studs
- Chemical Resistant Fittings
- Copper/Lead Free Applications

Nickel 2600 can be used in:

- Plants that require a Copper/Lead free Anti-seize
- Chemical Plants
- Oil Refineries
- Waste and Water Treatment Plants

Conveniently packaged in 8 oz Brush-Tops
