

SAFE NON-MELT

It is not unusual for the food industry to require grease that will perform in higher temperatures. Traditional H-1 products will separate with the oil escaping and the thickener turning hard. **SAFE NON-MELT** is a true non-melt product, performing in higher temperature conditions. It is also recommended for heavily loaded, slow turning bearings.

TEST METHOD

Penetration Worked	D-217	265 - 295
Thickener Type		Bentone
Thickener %	D-128	7 - 10
Color		Amber
Texture		Smooth
Dropping Point °F	D-2265	None
Viscosity, SUS @ 100° F	D-445	2500
@ 210° F	D-445	140 - 160
Viscosity Index	D-2270	90
Flash Point - °F	D-92	560
Fire Point - °F	D-92	600
